

New Waterproof Laminate Flooring Anthracite Travertine

41510004545

DIMENSIONS:

Length: 390mm
Width: 167mm
Thickness: 8mm

IMPORTANT:

All parts should be removed from their packaging and inspected for any transport damage and completeness prior to installation; you should read these instructions throughout before commencing installation. We do not accept responsibility for problems that may occur through improper installation.

All subfloors must be checked for suitability. Any damp, moisture or uneven subfloors must be dealt with prior to installation.

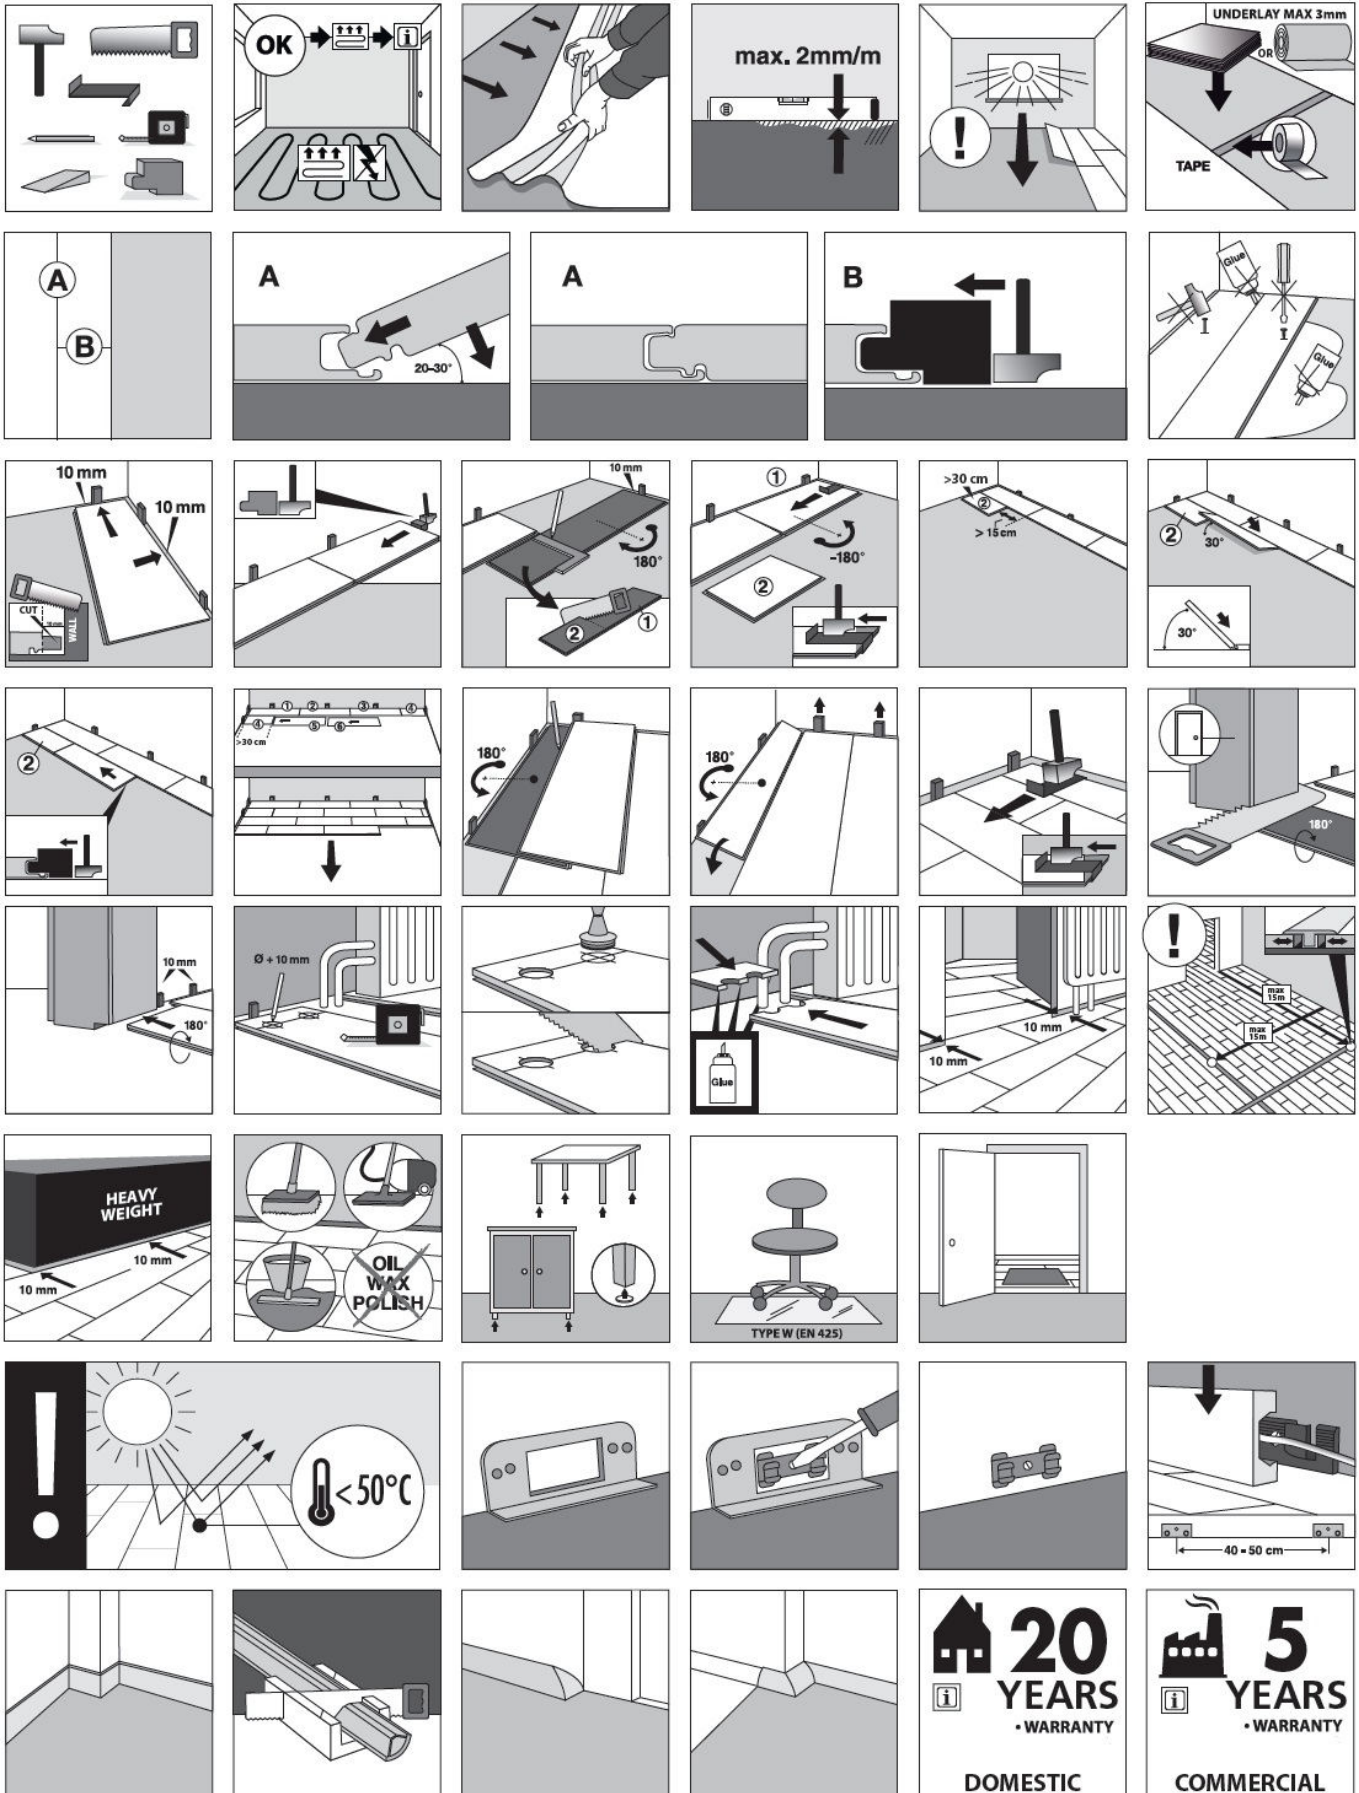

Any underfloor heating must be kept at temperatures suitable within the guidelines and installed within concrete screed.

Always consult your installer/supplier of the underfloor heating system prior to installation of the floor for suitability.

CARE AND MAINTENANCE:

bathstore Waterproof Laminate is generally cleaned with water and soap (mild non-abrasive detergent). The floor is resistant to bacterial and mould growth, which is ideal for allergy sufferers. The high density surface coating and the perfect waterproof seams prevent dirt from penetrating the floor.

We do not recommend steam cleaning this product.

Keep the boards in room temperature (between 18°C and 24°C) for at least 48 hours before you start the installation. Heating sources or others with direct radiation of more than 50° C are not allowed.
