IMPORTANT:

INSTALLATION GUIDELINES

1. Installation should be carried out by a competent engineer, in accordance with water regulations.
2. Before installation, ensure supply pipes are flushed clean. Debris or loose particles will affect the efficiency of the ceramic disc cartridge. Failure to flush through pipe work before installation of taps may cause serious damage to the ceramic disc cartridge, for which Bathstore will not be liable.
3. For mixer taps, it is recommended that hot & cold pressures are equally balanced.
4. Ceramic cartridge in hard water areas. To prolong the lifespan and reduce servicing periods we recommend that a suitable water softener be fitted. Consult your installer/designer for details.

CARE AND MAINTENANCE:

To maintain the appearance of this product, ensure that it is regularly cleaned only using a clean, soft damp cloth. A solution of warm water and a mild detergent may be used where necessary, and then the fitting rinsed thoroughly and wiped dry. Any other cleaning action will invalidate your warranty.

If the mixer tap has a diffuser it should be unscrewed and cleaned periodically in warm water.

Abrasive cleaners, scouring cleaners and acidic cleaners **must not be used** under any circumstances. Avoid contact with all solvents (including chlorinated solvents, ketones or acetones as these may result in surface deterioration or etching). Also avoid contact with any harsh household chemicals such as oven cleaners, drain cleaners, rust removers, paint strippers and toilet bowl cleaners, bar keepers friend, brasso or similar products.
